FADN in Serbia

- In Serbia the basis for the development of the FADN was established in 2011, when the EU funded project “*Establishment of the Serbian Farm Accountancy Data Network*” has been started implementing in Serbia.
- The first data were collected in 2011 from **40** agricultural holdings. In 2012 the data were collected from **172** agricultural holdings, in 2013 the data were collected from **497** agricultural holdings and in 2014 the data from **989** agricultural holdings were collected.
- It is the estimate of the MAEP that the final *FADN* sample in Serbia will include around 2000 farms.

Introduction

- According to the data of the agricultural census carried out by Statistical Office of the Republic of Serbia in 2012 there were **631 552 agricultural holdings in Serbia.**
- 203 665 holdings exceed the threshold of the economic size of €4000 and these holdings form the field of survey of the Serbian FADN.
- There are 943 holdings in the 2014 sample which exceeded the threshold of 4000 € and they represent a population of 203 665 farms in Serbia.
- All results calculated for Serbia is weighted average per holding and represents the situation in the Serbian agricultural sector as a whole.
