FADN EVOLUTION IN THE CZECH REPUBLIC

- Modern technologies and methodologies implementation
- Public data sharing and reusing

The FADN CZ questionnaire (items, tables and their number) may differ from the EU FADN.

RISKS AND OBSTACLES TO EXPANDING THE COLLECTION OF NEW INDICATORS

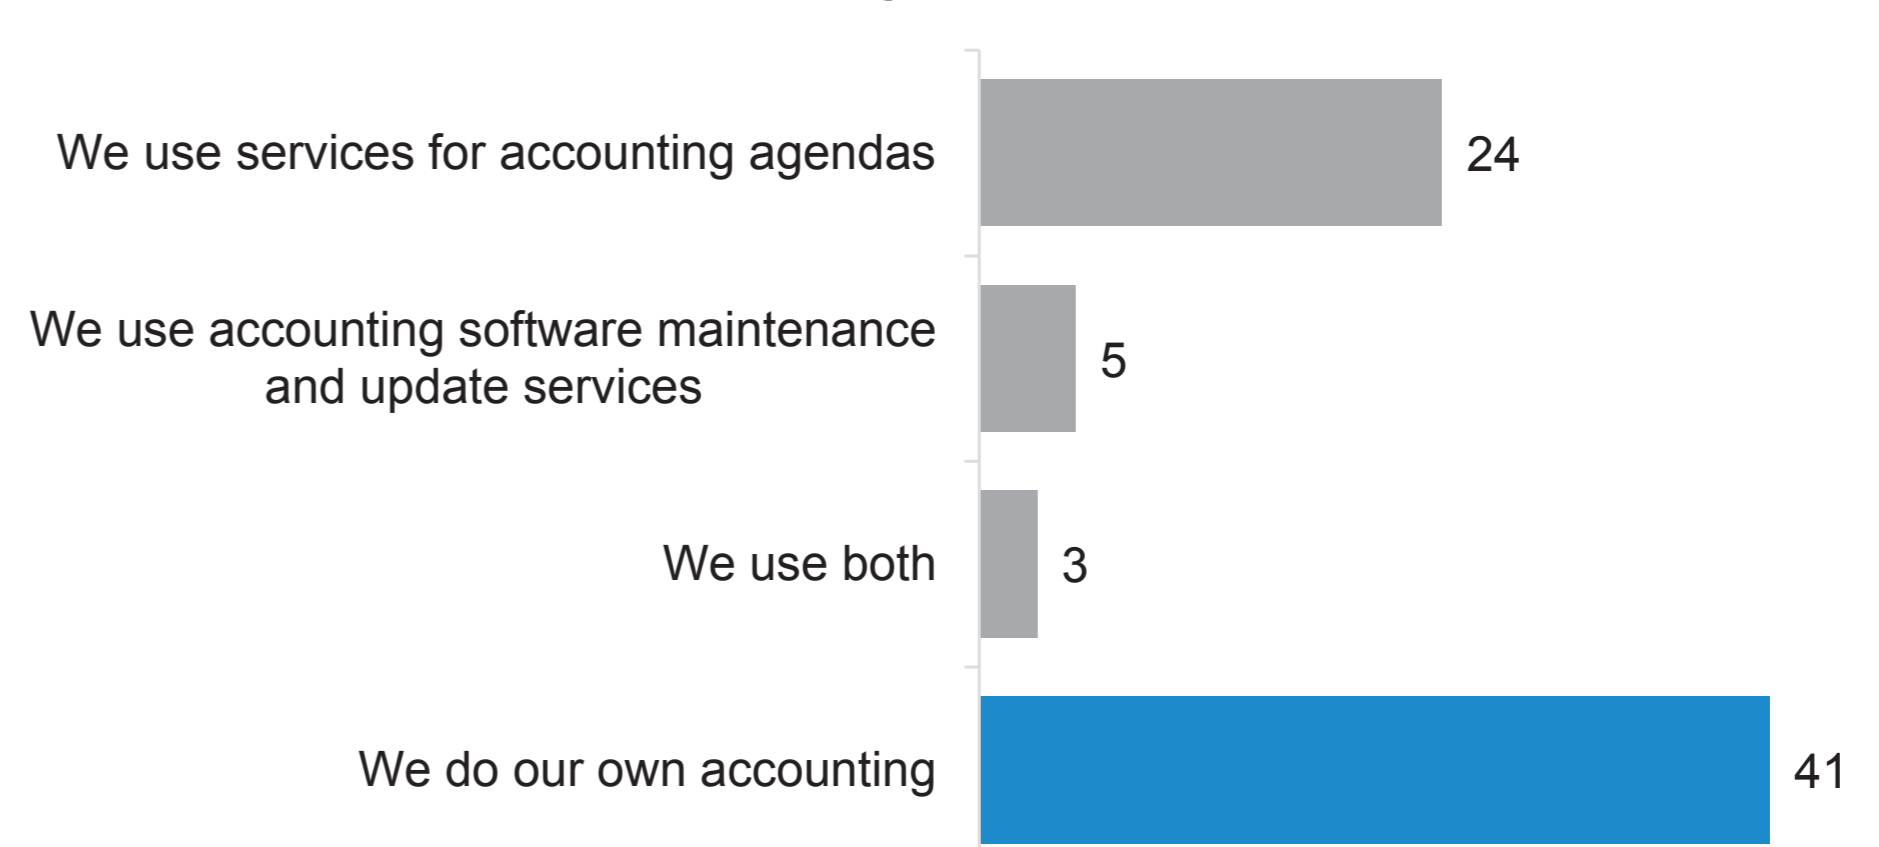

- TIME AND FINANCIAL BURDEN
- SYSTEM INCOMPATIBILITY
- LACK OF INTERDEPARTMENTAL COOPERATION
- FARMERS' RELUCTANCE - REPEATED SURVEYS
- DATA IN REGISTERS HAVE DIFFERENT CONTENT
- CONCERN ABOUT PERSONAL DATA

EXTERNAL SOURCES

- Land Parcel Identification System (LPIS) – Land use: Total Utilised Agricultural Area (acreage - arable land, meadows, ANC), Sowing plan of crops on arable land.
 - State Agricultural Intervention Fund – Producer Organisations; Subsidies.
 - Livestock Registr – Category, Closing valuation (number), **Type of Housing (Farmer's Portal)**.
 - Register of Ecological Entrepreneurs - farms and current certificates.
 - CRIBIS - application of the worldwide CRIF group, information on more than 10 million business entities and individuals.
 - Unified Repository for Fertilization and Yield Records – farms with area larger than 20 hectares of agricultural land.
 - ETRS_LAEA System – cartographic system used for geographic and environmental analysis in Europe.
 - Czech Telecommunication Office - Coverage map of the Czech Republic.
 - State Labour Inspection Office - European Statistics on Accidents at Work.
- (already used, planned to be explored for FSDN)

Accounting of respondents

Questionnaire online, collaborating survey agency: from 9/2024, this graph n = 73

61% with their own accounting use two well-known accounting systems; the automation import of accounting items = reducing the burden.
