## **Family incomes of Polish FADN farms**

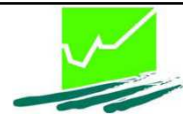

Prepared by:  
Lech Goraj  
IAFE-NRI Warsaw

### **List of topics**

- **Empirical base of the presentation**
- **Farm resources**
- **Technical performance**
- **Economic performance**
- **Summary**

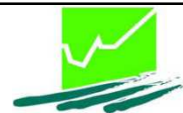

## **Aim of the study**

**Examine the size and structure of  
Net Farm Income  
and income of farm families  
in three groups of farms by OGA  
in context of growth of the  
agricultural holding**

3

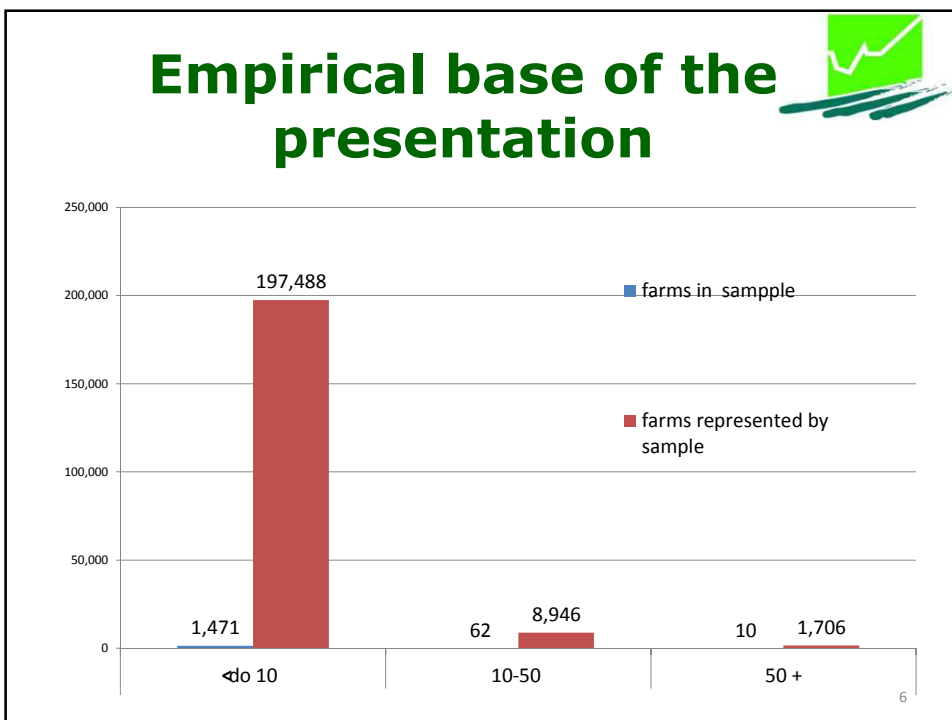

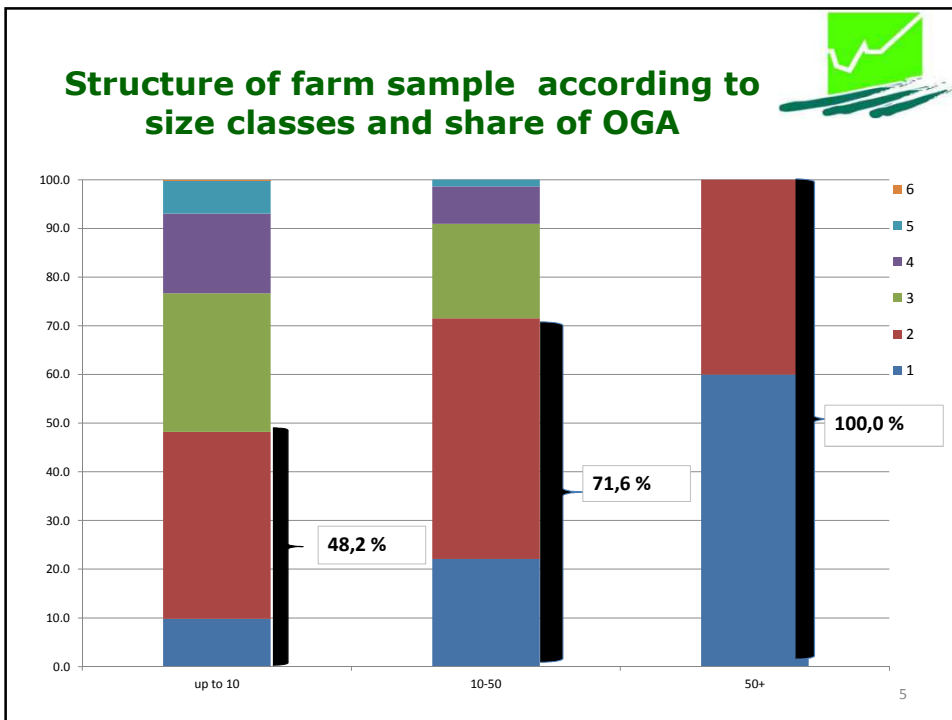

## **Empirical base of the presentation**

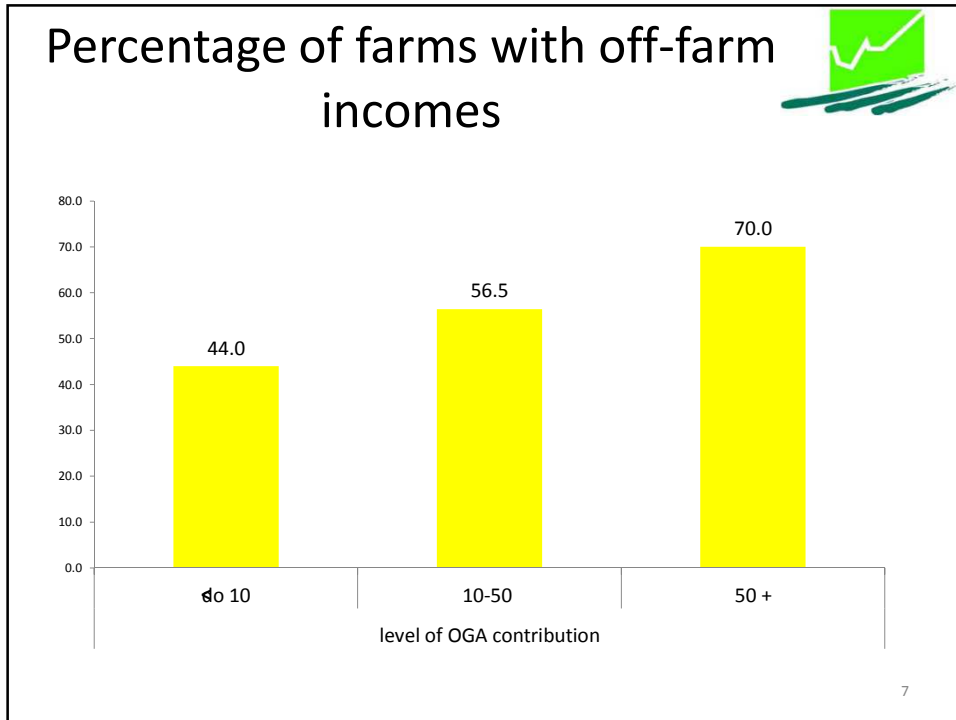

- **Standard Results 2011 from selected sample of 1.543 farms representing 208.139 farms in the field of observation of Polish FADN.**
- **Results of complementary survey off-farm incomes in Polish FADN farms**

**Sample consist farms from 4 types of farming (4; 5; 6; 8) and 2 (lowest: 1 and 2) economic size classes**

13

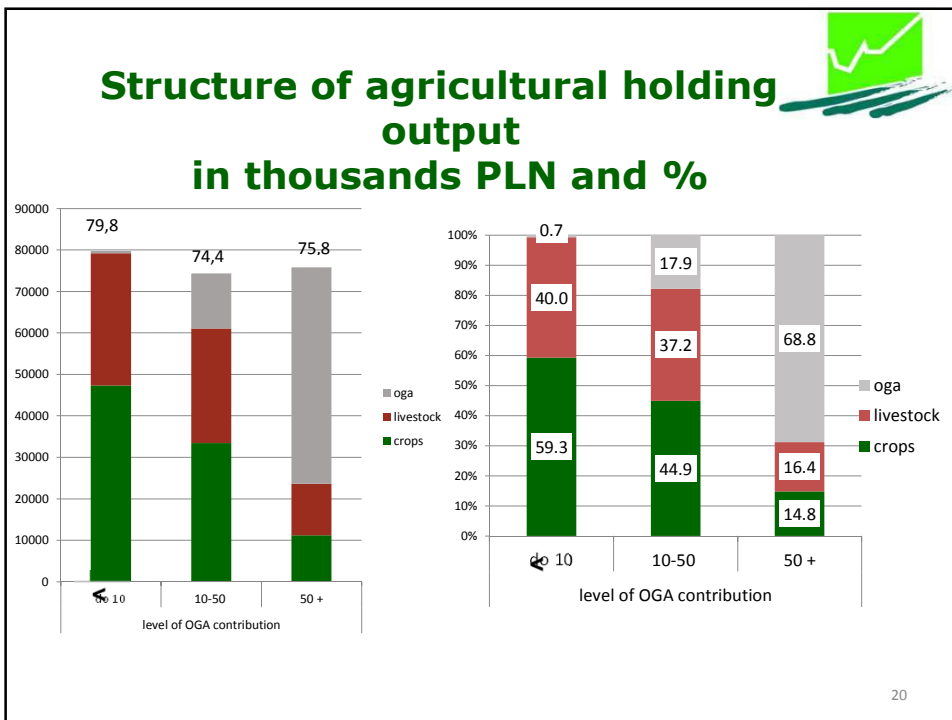

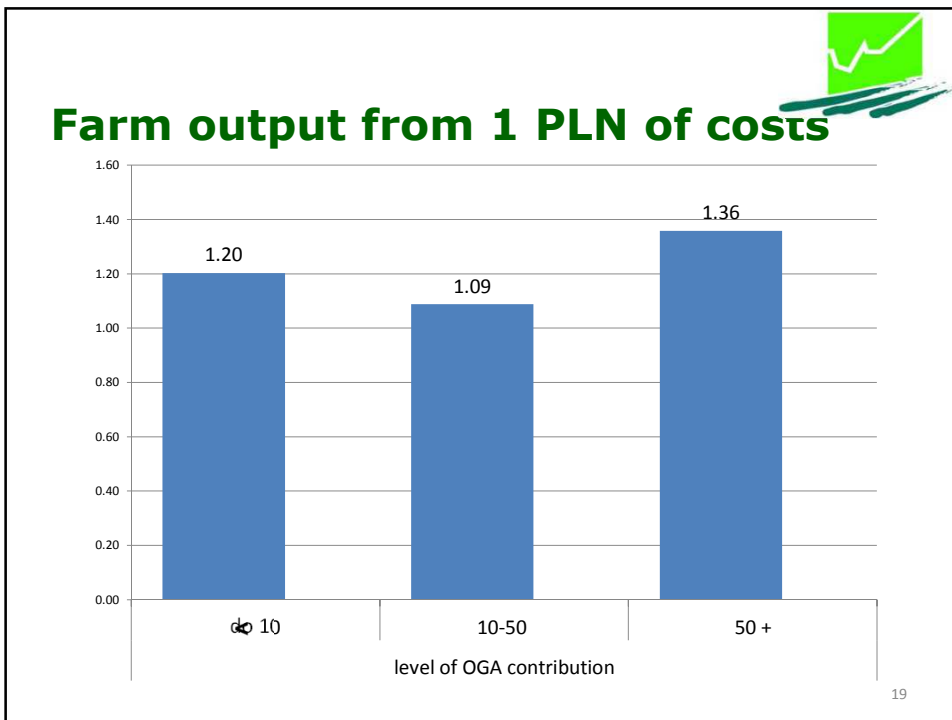

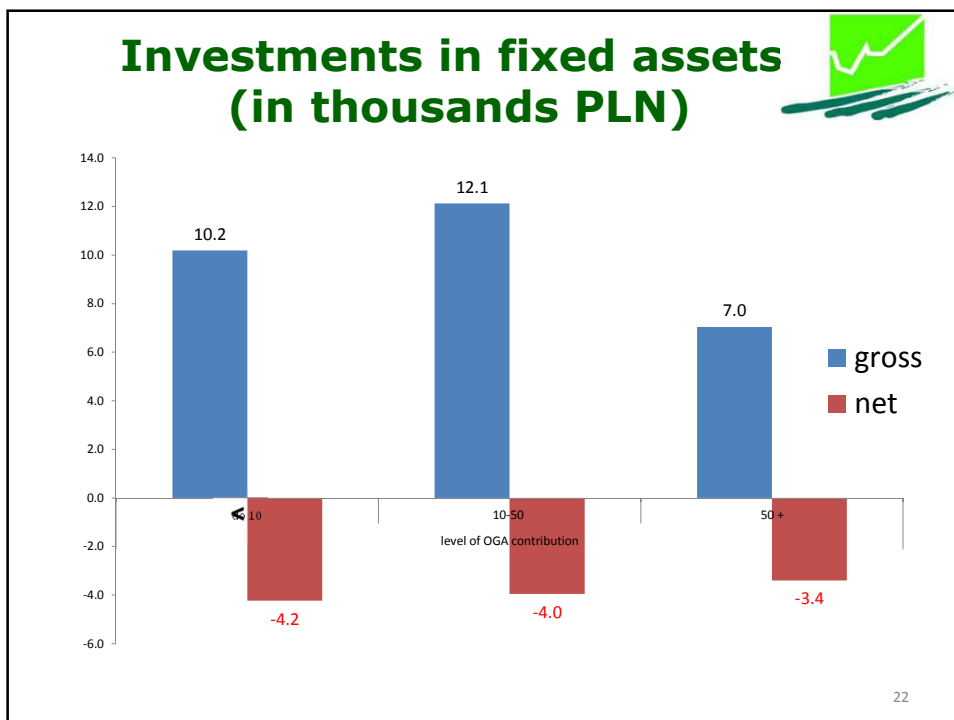

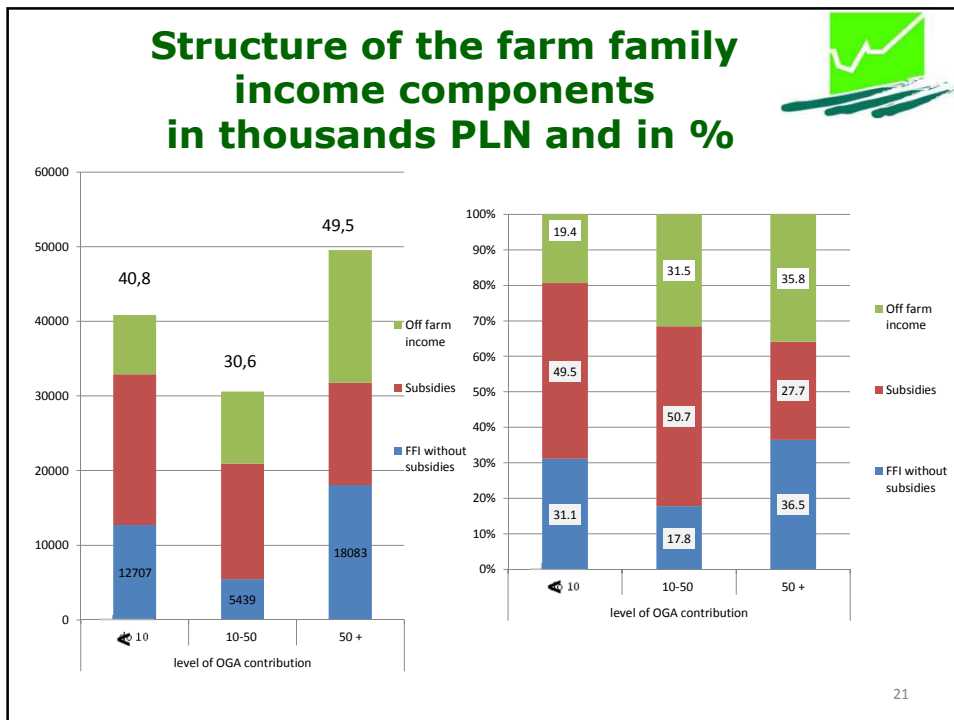

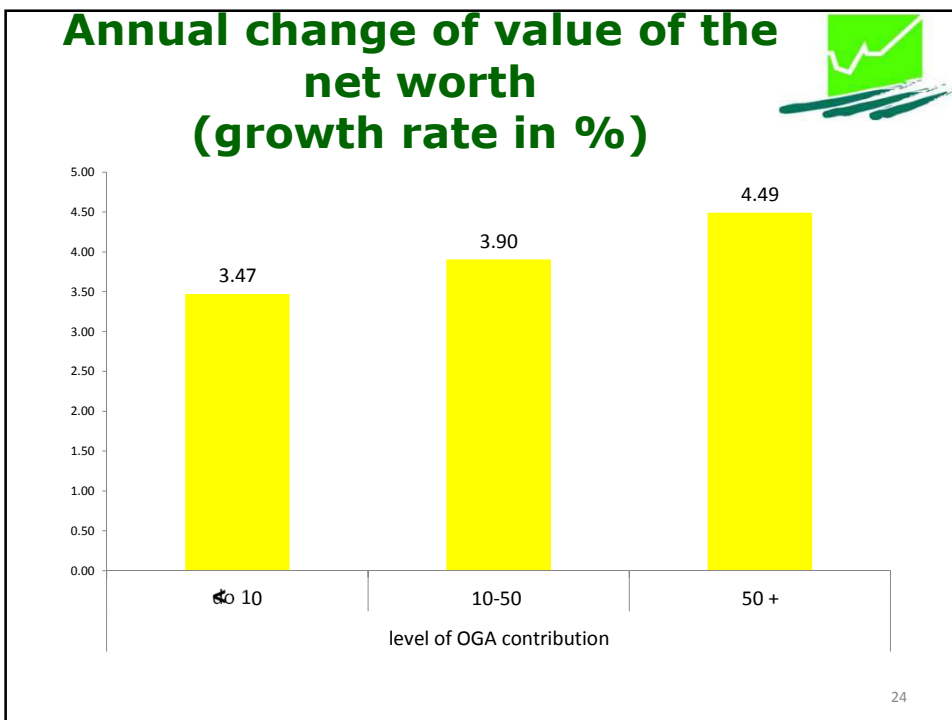

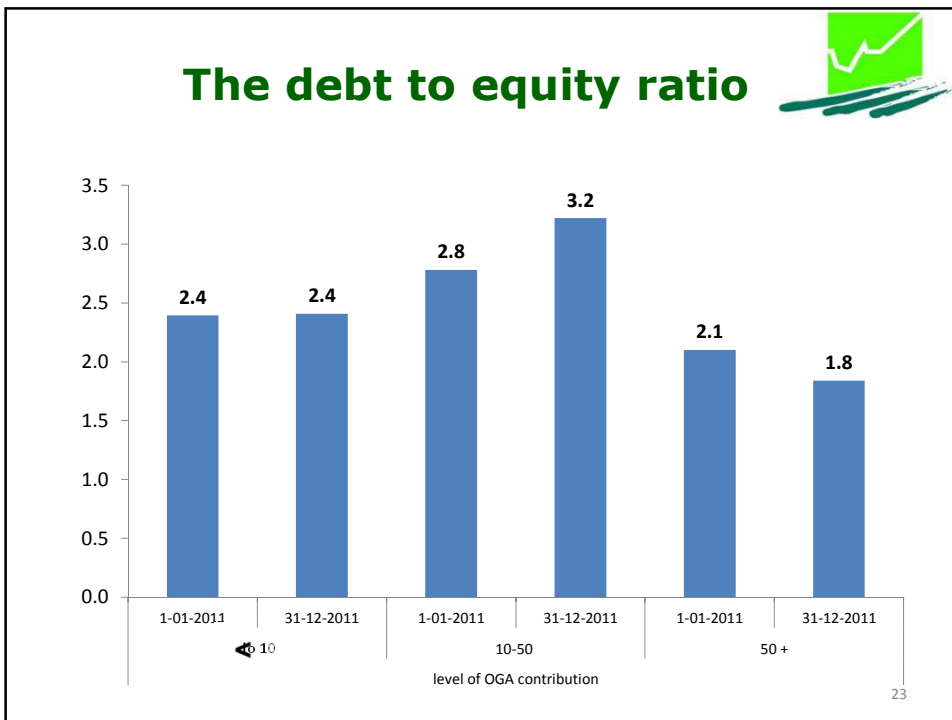

### Economic performance

18

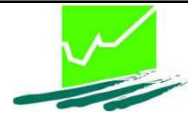

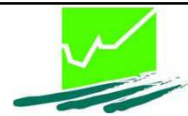

## Summary

25

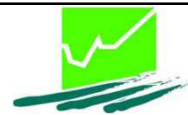

The data presented, illustrate different structures and results of the farms with different share of OGA in their annual turnover

26

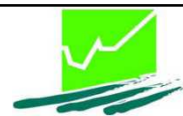

Higher share of OGA is observed in smaller farms in terms of economic size

27

Higher land productivity is observed in farms oriented on agricultural activity then oriented in OGA

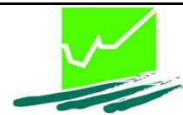

28

CAP subsidies play a key role in the farm incomes.

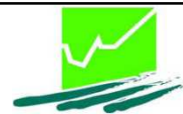

Off farm incomes are important in farm families incomes generation.

29

All groups of farms reported decrease in the value of fixed assets

30

Farms with OGA differ significantly from farms oriented on agricultural production.

Farms with OGA have a greater ability to create income than indicated by the Community Typology of Agricultural Holdings.

It seems reasonable to determine representative samples from three OGA groups of agricultural holdings for FADN needs.

31

**Thank You**  
for your attention...
