Milan Rakić
-September 2014-

Establishing farm accountancy data network in Republic of Serbia

Basic Information:

Data are collected directly from the Agricultural holding, and they are not based necessarily on a systematic records.

The data are confidential;

The participation in Serbian FADN by agricultural holdings is **VOLUNTARY**;

631555 Agricultural Holdings' 2012 census year. “

Threshold is decided to be 4000 euro;

Research Area 200.087 farms.

	3	4+5	6+7	8+9	10+11	12+13+14	Total

Specialist cropping

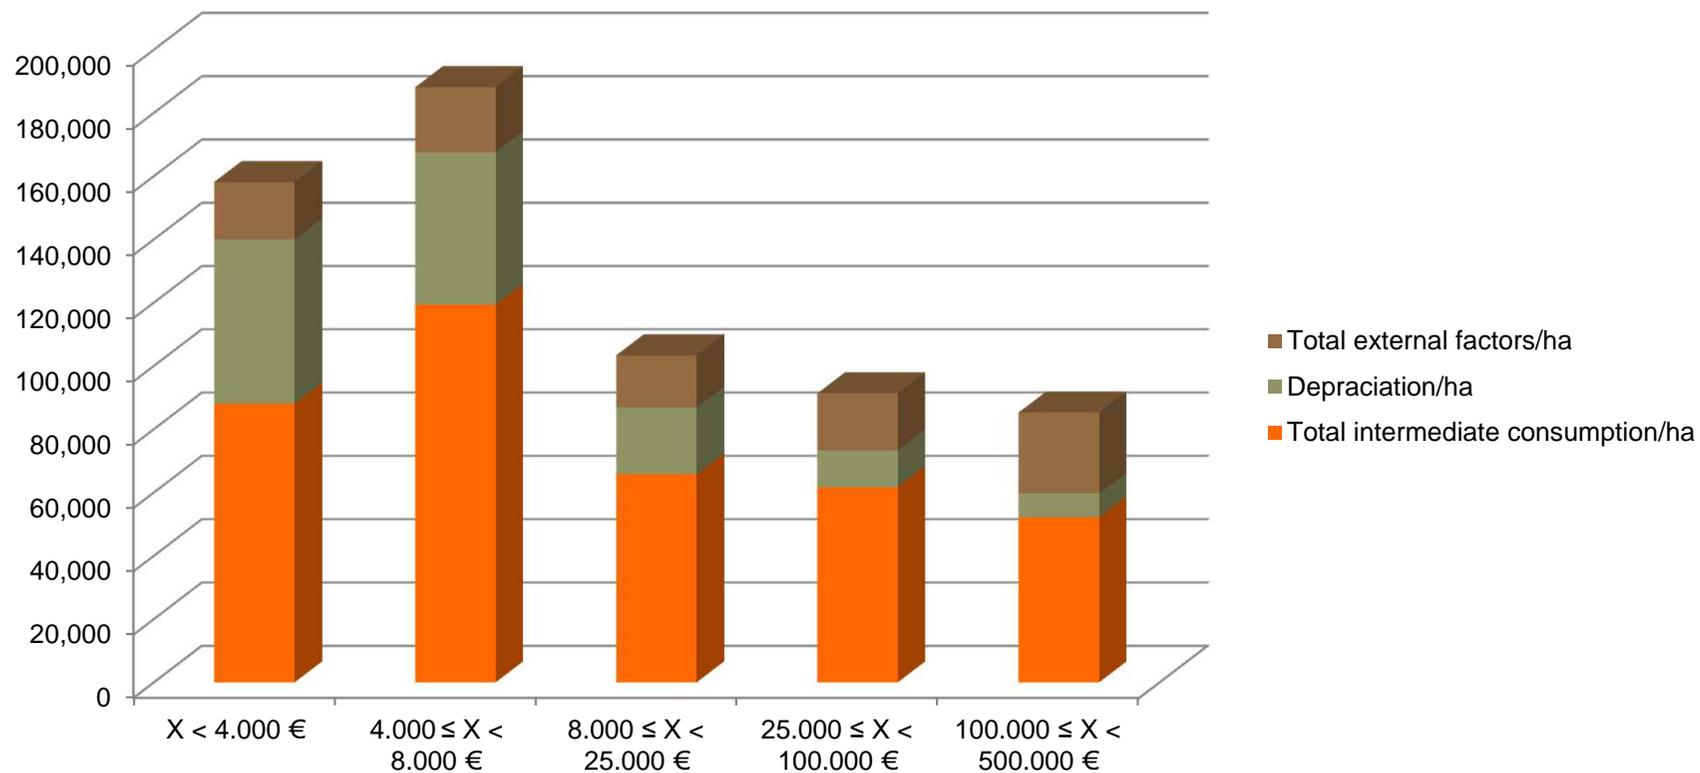

Family farm income/FWU

- Family farm income per family work unit (Unpaid labour) increase proportional together with reising of economic size of the holding

Total inputs structure

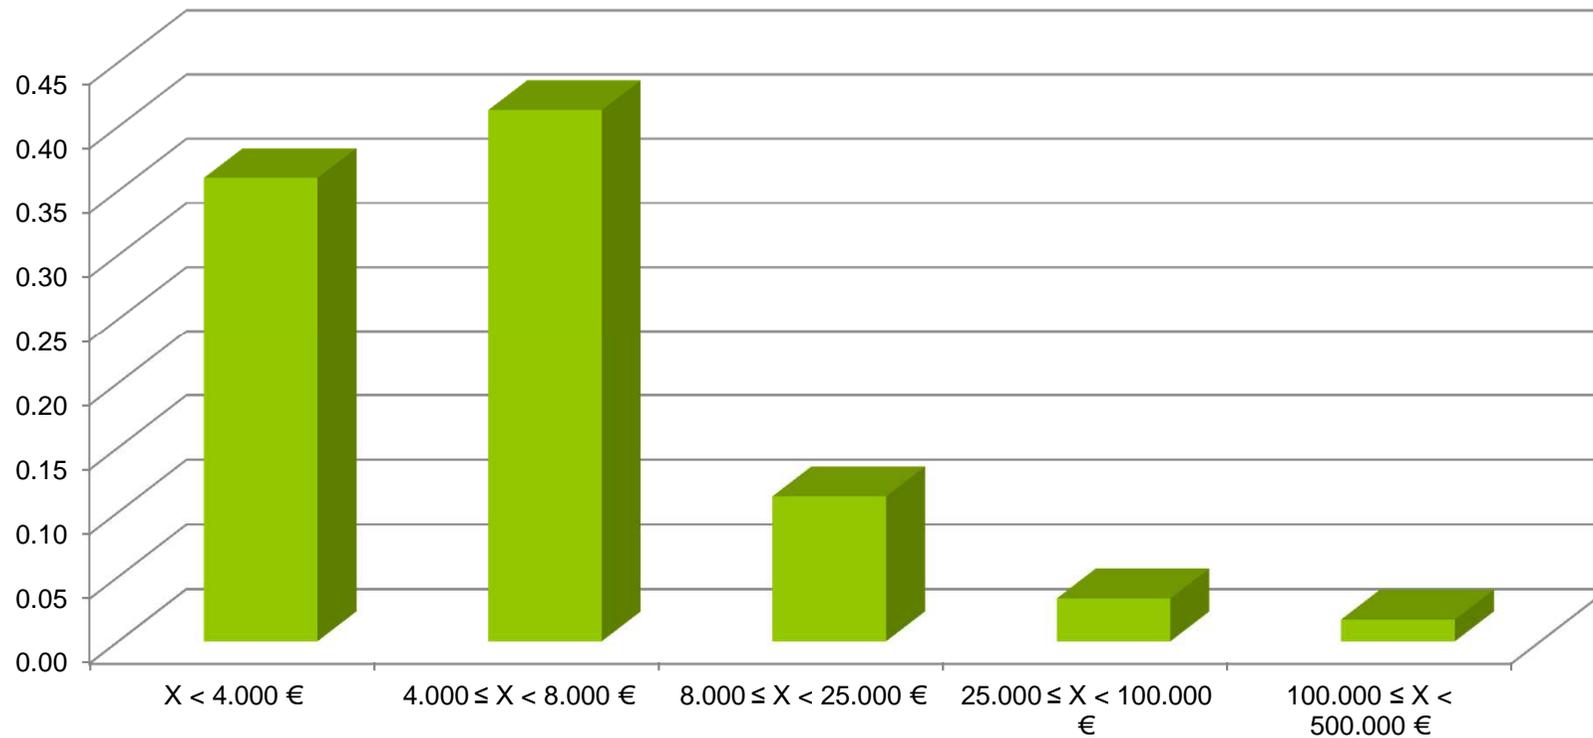

- Holdings in bigger size groups have lower input per hectare (factor of efficiency)

Specialist cropping

Labour - AWU/ha

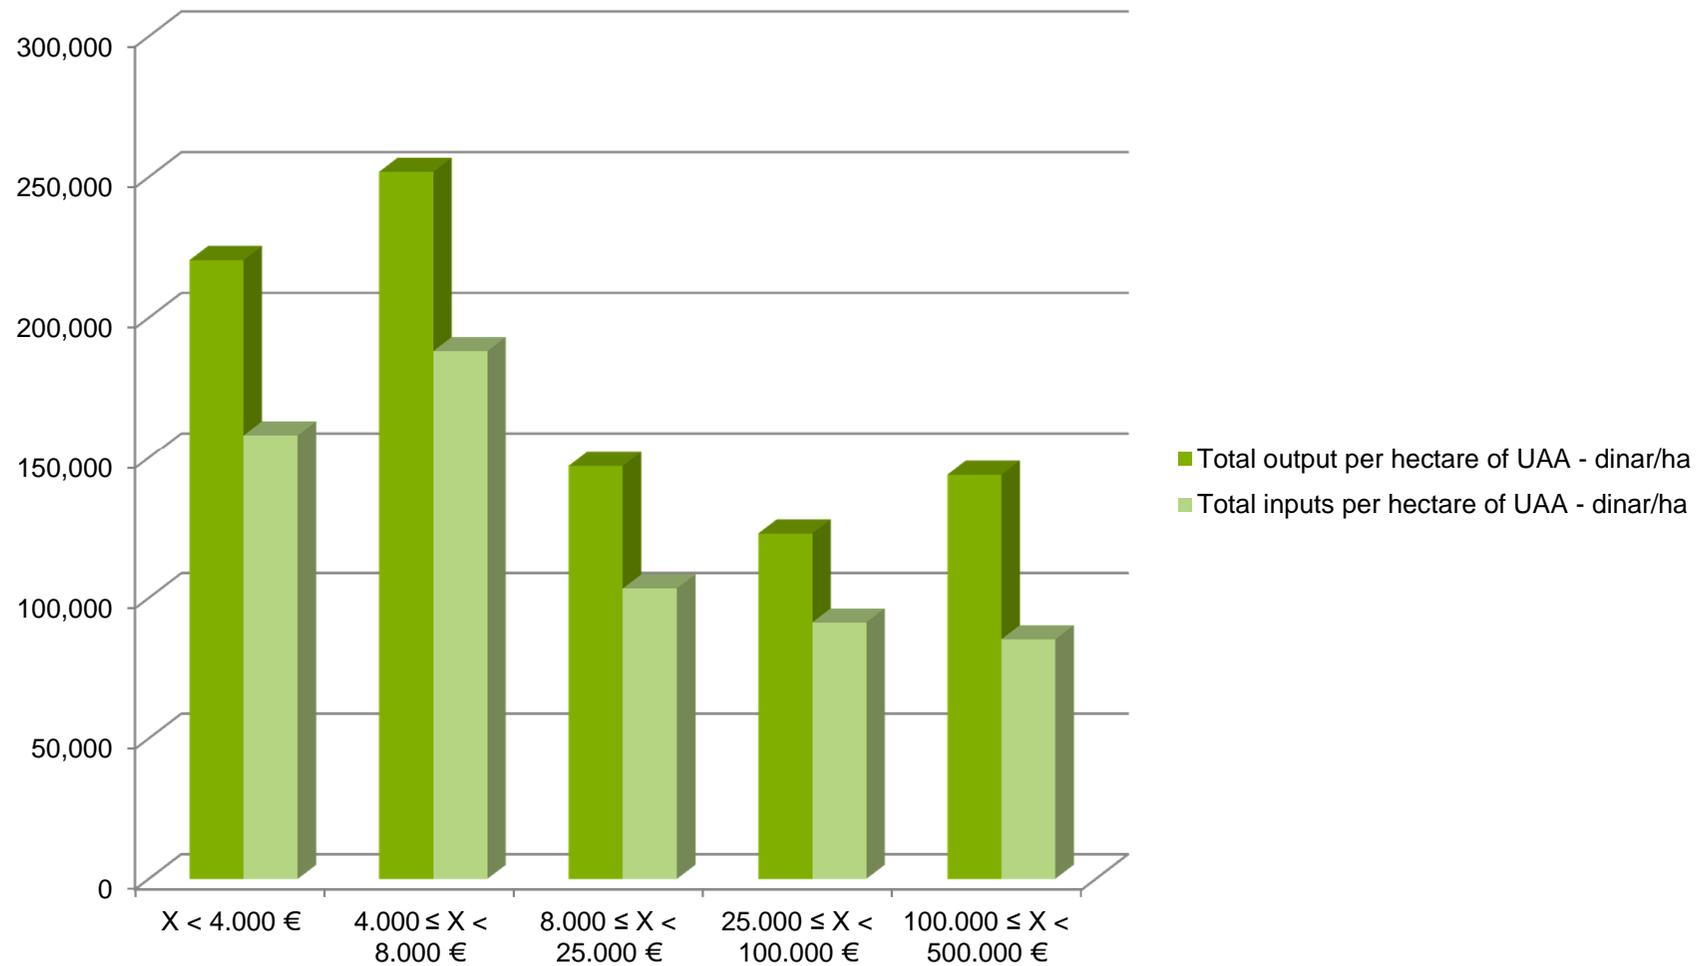

- Smaller farms have bigger labour input per hectare comparing to holdings from bigger size group. Bigger holdings use labour more efficient.

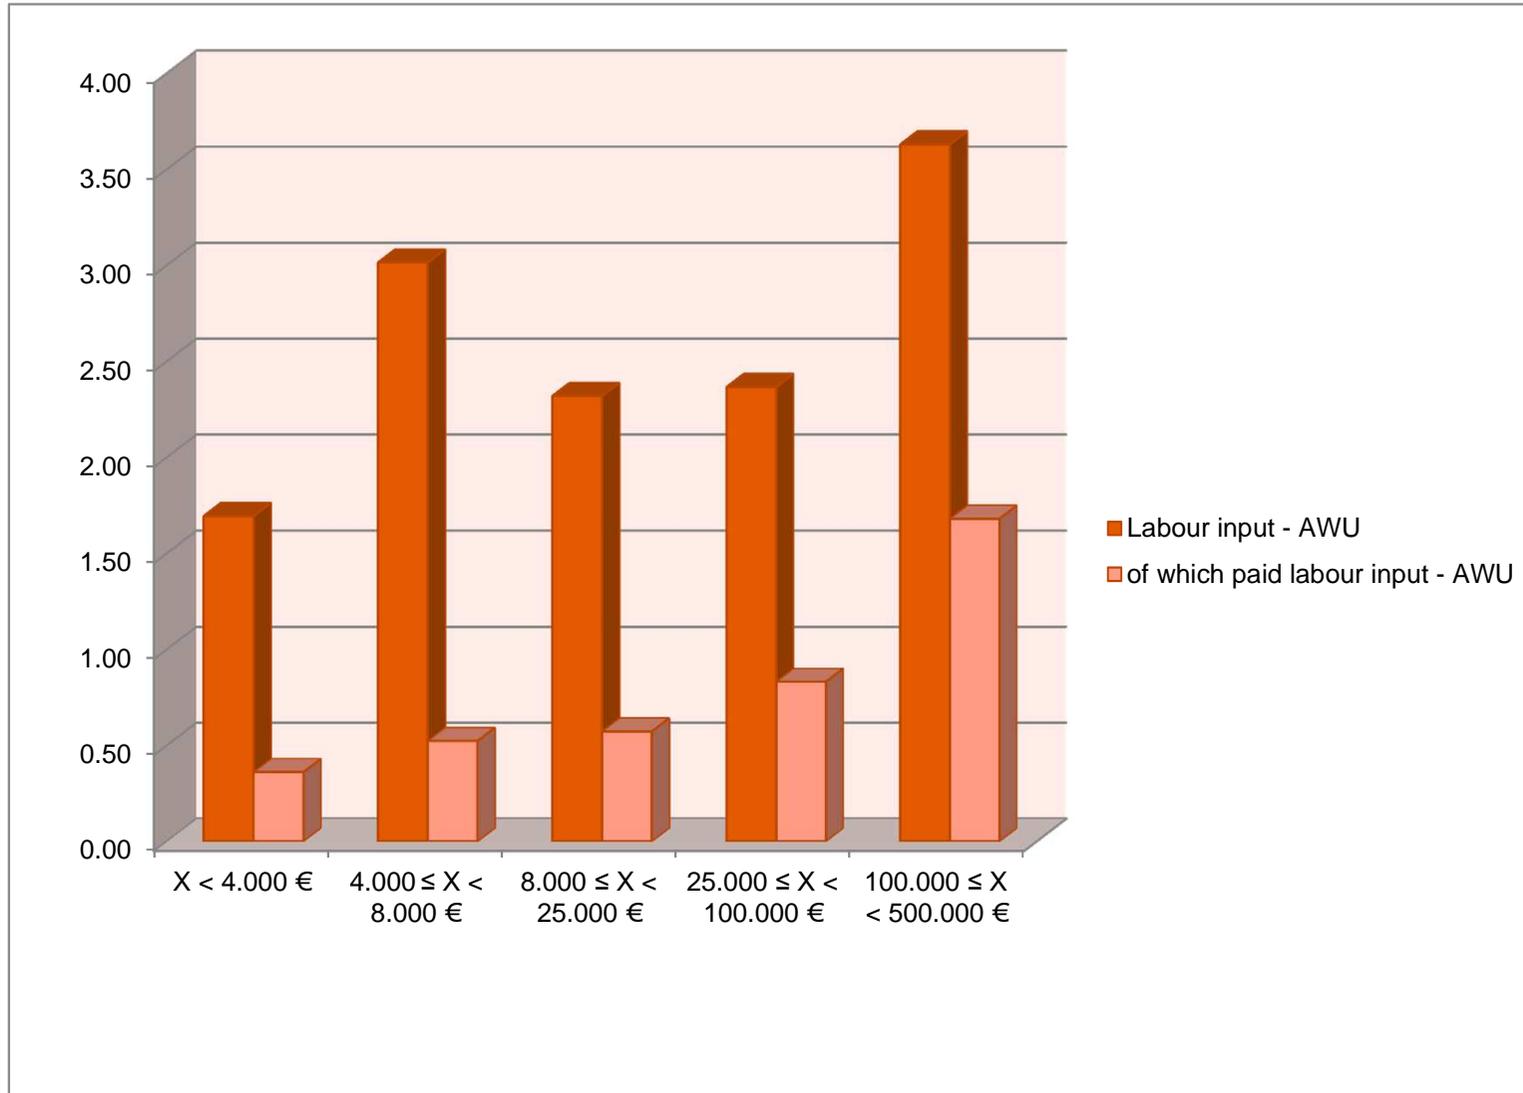

Specialist cropping – economic coefficient (input/output)
